Blair, I need the updated data in order to process the file for the County. Is there a problem that is preventing you from submitting it?

Blair, these parcels decreased in size adjacent to the street, perhaps a wider sidewalk? Streets and sidewalks are not part of the parcel.

How can you get a decreased parcel size without an increase to another, adjacent parcel?

Hi Katie, according to the County records, it appears that there have been some parcel size and/or building changes on these parcels:

[5148019020](#)

Bldg Area: **45,583** (seems like an addition to the old bldg recently?)
Land Area: **14,945** (the parcel decreased slightly in size from before.)
FF: **246** (slightly lower again due to decreased parcel size).

[5148020010](#)

Bldg Area: **0** (same as before).
Land Area: **8,208** (parcel size decreased slightly).
FF: **57** (same as before).

[5148020011](#)

Bldg Area: **213,560** (same as before).
Land Area: **26,570** (parcel size decreased slightly).
FF: **352** (slightly lower again due to decreased parcel size).

So if you apply the updated numbers for each parcel to the 2017 rates, you should get the new assessment amounts.

Hi Dennis,

I see that the new parcel numbers are replacements of the old parcel number listed above. May I ask what triggered the replacement of old parcel numbers with the new ones? Is there any change in the property that would change the way we calculate the assessment?

Thanks,

Karen
